Does your child have asthma?

Dr. Sally Wenzel and Dr. Fernando Holguin at the Asthma Institute and Children’s Hospital of Pittsburgh would like to talk with you and your child about a national research study for African American children, ages 5—11, with asthma. The main goal of the study is to improve the health of asthmatics.

- Asthma medications, research study related tests, including: breathing tests, blood tests, and allergy testing are provided at no cost.
- Compensation is provided at each visit.
- Parking or bus fare provided throughout the study.
