Brain Development Research Study

Help us understand how your child’s brain develops!

The Laboratory of Neurocognitive Development at the University of Pittsburgh is conducting a study to understand how our brain changes as we develop into adults.

Who’s eligible?

- Healthy 12-17 year olds
- Some exclusions may apply

What’s involved?

- Questionnaires
- Computer games
- MRI & EEG brain scans

Participants will be compensated for completing the study
Travel reimbursement is also provided
