Are you currently breastfeeding your baby?

If so, you may be eligible to take part in a cutting edge research study. Researchers at the University of Pittsburgh are studying the cellular contents of breastmilk and identifying the cells within human milk that have regenerative capabilities.

This study will take place at Magee-Womens Hospital Clinical and Translational Research Center.

Moms who are eligible will:

- Have only 1 study visit
- Express a sample of breast milk
- Complete a questionnaire

This study does not involve any treatments or medications. You will be compensated for your time. For more details, and to see if you qualify, call 412.648.3010 or e-mail milk@pitt.edu.
