Do you or a family member have a history of Depression?

UPMC is conducting a research study of adolescents aged 13-17 who have an immediate family member with a history of depression, but no history of depression themselves.

Your adolescent may be eligible if:

- You (parent) or someone in your immediate family (participant’s biological sibling) has a history of depression
- Your adolescent has no history of depression, bipolar disorder, autism, schizophrenia, severe/chronic known inflammatory illness (Crohn’s disease, asthma requiring daily inhaler, leukemia)
- Your adolescent is not a daily smoker
- Your adolescent does not have a history of head trauma
- Your adolescent is not currently taking psychiatric medications

This study includes:

- Interview and Questionnaire
- Computer tasks
- Brain imaging scan
- Blood Draw

Participants will be compensated.
