Depression Research Study

*Ages 0-18 years*

Are you a healthy child or adolescent?

If so, you may be eligible to participate in a study conducted by physician researchers at the University of Pittsburgh.

We are currently looking for children and adolescents who:

- Have no current or past history of depression
- Are between 0 and 18 years of age.

We are studying blood markers of depression. Participation involves two study visits. Participants are asked to complete an assessment interview and to give blood samples.

Participants will be compensated for study participation.
