The FAB Study

Are you the birth mother of a 11 to 14 year old child?

Do you have history of depression?

You and your adolescent may be eligible to participate in a research study with the University of Pittsburgh, Medical Center on how adolescents and their mothers enjoy fun experiences together.

Participation will involve two to four laboratory visits.

You and your child will be asked to complete interviews and questionnaires.

You and your child will complete two interactive tasks together.

You and your child will each complete a brain scan.

Compensation will be provided.

If you are interested in participating, call the CARE lab at (412) 624-7991 to set up a visit.
