Teens with ADHD Study

- Does your teen have ADHD?
- Is your teen 13 - 17 years of age?
- Is your teen currently prescribed stimulant medication? (e.g., Adderall, Concerta, Vyvanse, etc.)

You and your teen may be eligible for a research study conducted by the University of Pittsburgh!

What is involved in participation?
- Completing an online survey
- It will take approximately 30-45 minutes
- It can be taken on your smart phone, tablet, laptop, or desktop computer

Why is this research being conducted?
We want to learn more about how treatment is being delivered to teens with ADHD and the factors that affect teenagers’ healthy management of their ADHD treatment as well as parents’ experiences with ADHD treatments (specifically, the use of medications and how they are managed).

You will be compensated for your time.
